Skills Summary

🚀 Technologies

- Spark
- Hive
- Airflow
- Presto
- PostgreSQL
- AWS

‹› Languages

- Java
- SQL
- C++
- Python
- JavaScript
- Bash

Work Experience

NerdWallet
Data Engineer
May 2017 — Present
https://www.nerdwallet.com

- Building a data lake with the Data Warehouse team to scale NerdWallet's data infrastructure
- Contributing to the development of a custom Protobuf to Parquet file writer
- Improving data pipeline performance using Spark

Symantec
Cloud Developer
September 2016 — December 2016
https://www.symantec.com

- Delivered high quality code across the full stack through pair programming and test driven development
- Partnered with a designer to build a prototype for the new enterprise cloud security portal

Public Safety Canada
Software Developer
January 2016 — April 2016
https://www.publicsafety.gc.ca

- Improved critical infrastructure visibility by developing a variety of monitoring tools in Python
- Reduced coupling by refactoring parts of a monolithic .NET application into RESTful microservices

Evertz Microsystems
Java Developer
May 2015 — August 2015
http://www.evertz.com

- Collaborated with hardware engineers to implement new features in an SNMP monitoring and control application
- Conducted network traffic analysis and troubleshooting

Education

University of Waterloo
🎓 Computer Science
September 2014 — Present
https://uwaterloo.ca

Favorite Courses

- Applied Cryptography
- Database Management
- Operating Systems
- Designing Functional Programs
